 JPRS: 7296.  
 Order from OTS \$0.75

61-21127

Trans. of Ch'i Hsiang Hsiieh Pao (Chinese People's  
 Republic) 1959, v. 30, no. 4, p. 350-360.

The distribution of monsoon: This distribution of mon-  
 soon index explains that the southeastern part of  
 China is the strongest monsoon area, the northern  
 part is a weaker monsoon area, and a narrow weak  
 monsoon area also exists along the southeastern  
 coast. This shows that the distribution of the strength  
 of monsoon is complicated. Monsoon field: A clear  
 monsoon boundary line has been found existing be-  
 tween China and India. The existence of this boundary  
 line is inseparably related to the influence of the  
 Earth Sciences--Meteorology. TT, v. 5, no. 8(over)
